INTRODUCTION

Hi, my name is Edward “ACE” Bradford, The ACE of Sports Picks and I would like to personally **Thank You** for purchasing a copy of Betting on Baseball for Massive Profit. I am very excited to launch my personal baseball betting system to the public and change the lives of many! I have spent hundreds of hours and many of months, researching and testing this baseball betting system to make sure I am providing you with a top notch, quality product. I have put together a step-by-step, fool proof, baseball betting system that will yield massive returns, no matter the size of your starting bankroll.

I have used this very system for the past 3 MLB seasons and have generated a MASSIVE amount of income with it. Until 2009, my system has stayed private, only being used by a few close friends and myself. I have now unleashed this animal to the betting community. Now it is your turn to grab a piece of the action!

Also, as a **BONUS**, for those who use online Sports Books, I have included links to the online Sports Books that I personally use and trust that offer great signup bonuses! These signup bonuses are an instant win! After all, the best money to use when investing is always OPM, Other People’s Money!

Another **BONUS** I added was the Power System. Learn how I generate disgusting amounts of profit using only (3) key months of the MLB season.

As an **EXTRA BONUS**, I will give you a free (90) day membership to my personal website where I will release my top rated “non-system” plays, to my Members Only! These are the exact same picks that I will be personally betting on! The picks are NOT the same as the system picks. Think of it as exactly what it is, an EXTRA BONUS! These picks will make you money on top of what the system will generate and include (MLB, NFL, NHL, NBA, College Football, College Basketball, Boxing and MMA). My 2008 combined NFL and NCAA FB plays were an amazing 59-21 (73.7%)!

About the Author - Me

Before we get started, I want you to know who I am and a little about me. I am a 31 year old happily married man with a beautiful 2 yr old daughter. I graduated from the University of Wisconsin in the year 2000 with a Bachelors Degree in Business Administration. Upon graduating college I jumped into the insane and highly lucrative (at the time) real estate mortgage business. I hit the ground running in my new career and within 3 years, I started my very own mortgage brokerage firm.

I was then self-employed in a booming business and making good money, very good money. As I was working hard growing my business and making a great deal of income, my wife and I took up traveling as a hobby. We took great vacations throughout the United States, the Caribbean, Mexico, the Dominican, and Aruba to name a few and we eventually found ourselves sitting in the hot Nevada desert in a city known as Sin City. My wife and I instantly fell in love with Las Vegas, NV as it offered us everything we were looking for in a vacation spot: short travel time, late night partying, pools, sun, shopping, great food and gambling!

We found ourselves going out to Vegas about every other month to get away for a few days of fun in the sun! While gambling, I mostly played black jack and other table games while I was out there. I guess I was looking for the instant gratification or the quick kill that black jack had to offer (kill or be killed I should say). Until one trip, when we were out there for a Super Bowl party in 2005, I decided to throw a few dollars on the team I thought was going to win, along with a ton of prop bets (like whether the coin toss result would be heads or tails etc), about \$3,000 in total wagers. I think I lost just about all of my bets that day. However, I never experienced a bigger thrill while watching a sporting event, than the thrill of knowing you have real money riding on it.

I had bet on sports before. While I was in college, I had placed wagers online on baseball and football, but never any large amounts of money were ever played. Maybe a total of \$100 for the weekend spread out over 4-5 bets would be my max back then. It was intense watching those games knowing how hard I worked

for that \$100 back then. I had minimal success back then, and eventually I grew away from gambling as I had limited money to do so.

After this 2005 Super Bowl trip to Vegas I started thinking about sports betting again. I had always been a sports enthusiast ever since I can remember. I am also a numbers geek. As a matter of fact, I have a financial calculator sitting on my night stand next to my bed for those late night theories and formulas I come up with! Having these two qualities and the power of the internet at my fingers, I figured I could be the greatest sports handicapper that ever walked the earth! I could statistically figure out all of the secrets and advantages that other bettors were too lazy or incapable to figure out!

So, during the Spring and Summer of 2005, I started putting together spreadsheets like a mad man (I love MS Excel!). I was charting team performances, Day vs. Night games, Grass vs. Turf, Home vs. Away, Favorite vs. Dog, Player vs. Player performances etc. You name it and I had a spread sheet prepared for it. I generated a system of picking teams and a set of rules that went with them. I started making these plays both while on my trips to Vegas and through online sports books and had seen great success. I won a little here, lost a little there, but overall I was up and winning consistently.

Why was I not hitting it super big? Like I said, I was winning, but not enough where I could sell my business, retire and become a full time professional sports handicapper. I couldn't figure it out? I was doing all the research, the math and placing the most educated picks, what could I be doing wrong? The system I created was working, but it was missing one small step. A mystery step that could break my system wide open and destroy sports books cash vaults across the globe! But what could this step be? I continued to generate my decent sized winnings as I went, and just became happy that I was winning period!

Then late summer of 2005 it hit me! I had wagered on a 7-Team Parlay, using MLB Money Lines and that day there were 7 of MLB's top starting pitchers on the board. I hit that 7 teamer hard! However, since the odds were so good that those ACE pitchers and teams would win, my payout wasn't the best. However, I still won a good chunk of cash. As I was whining about the fact that the odds sucked

so much, that's when I realized that the **SMART & SAFE PLAY** could actually pay, and pay well if used correctly! I had very rarely ever bet using parlays in my betting career. Maybe a 3 teamer every now and then, but that day the opportunity presented itself when those 7 ACE starting pitchers were all on the board together. Leveraging money on the top teams!

I made the decision to start playing my picks a little safer than before and took GREED out of the picture, played the sure thing and go home a winner! I knew I was onto something and buried my head deep into spreadsheets and the internet, tracking past betting lines from games over the last few years to test patterns and possible outcomes.

I tested, tested, and tested some more. Trial after Trial and finally I got it! The winning recipe! It was a simple fix in both handicapping and betting strategy! My new system was born! I developed a step by step baseball betting system that generated mind blowing results. A system that I felt I could build massive wealth on, and I am!

I have tweaked my system even more for this book, and the general release to the public. My original goal was to put out a quality betting system for the average bettor. The person who works their butt off during the week at their job and wants to make some extra money on the side, betting on the sports they love to watch, who doesn't have a \$10,000 bankroll to start with, who needs to feed their family, who has bills accumulating, who has kids to put through school and who understands that there is no system IN THE WORLD that they will be able to quit your job today, and become a millionaire overnight.

I wanted to create a system for the person that is open to following a few easy steps to dramatically increase their winning percentage and in turn increase their bank roll. The person that has the patience that if they follow this simple system, over the next few MLB seasons, they will make a MASSIVE amount of money! Patience is the key here. Greed has to be taken completely out of the picture.!

The 1st year is slow, and you will not see your bankroll turn into a million dollars. However, after you reinvest your winnings, in as little as 3 MLB seasons, you will

be pulling in Hundreds of thousands of dollars per week! No lie! I hope in 2 years each and every one of you contact me with a testimonial on how you finally quit your job and paid off your home. Or a testimonial bragging about how you will retire early (like me!) Or a testimonial with you standing next to your second home, "office", in Las Vegas, NV with a new Car (BMW, Mercedes, Ferrari, Lamborghini, Range Rover, Ford, Chevy or whatever floats your boat!) in the driveway. Just remember while you are enjoying your new lifestyle, Remember the Golden Rule.....Do unto others as you would have them do unto you!
ELIMINATE GREED!

Basic Sports Betting Glossary

Before we get started, here are a few sports betting terms you should know of if you don't know them already.

Sports Betting Lines/Odds (USA): There are two possibilities, the odds can be either a positive or a negative figure.

Positive figures

If the odds are a positive figure (underdog), the odds are quoting how much money will be won on a \$100 wager (this is done if the odds are better than even). Even odds are quoted as 100. Fractional odds of 4/1 would be quoted as +400, while fractional odds of 1/4 could not be quoted as a positive figure, but as a negative figure (favorite).

Negative figures

If the odds are a negative figure (favorite), then the odds are quoting how much money must be wagered to win \$100 (this is done if the odds are worse than even). Even odds are quoted as 100. Fractional odds of 1/4 would be quoted as -400, however fractional odds of 4/1 could not be quoted as a negative figure, but as a positive figure (underdog).

Money Line Bet: Betting on the Money Line Odds is betting on which Team you think will WIN outright (by 1 run).

Run Line Bet: The baseball version of betting [against the spread](#). The run line adds 1.5 runs to the [underdog](#) (+1.5) or subtracts 1.5 runs from the [favorite](#) (-1.5). The favorite team must cover this 1.5 Spread, and win by 2 runs. A new set of Odds are given to the Run Line Bets.

Bank Roll: The total amount of money you have set aside to be used towards sports betting wagers.

Betting Unit: A predetermined amount of money used as your base bet. If you had a \$100 Bank Roll, and your base betting Unit was to be set at a 10/1 ratio for the season, your betting Unit would be \$10.

Sports Book: A person or company, live or online that accepts bets/wagers on sporting events.

Odds Maker: An individual who creates the opening lines/odds and then possibly later adjusts the lines/odds, on a sporting event.

Play: Same as a Bet or a Wager.

Favorite: The team that is predicted to win.

Underdog: The team that is predicted to lose.

Are you ready to get started yet? I hope so! You will now be learning my great baseball betting system that will change your life forever! Thank you once again, and please, please, please share your success stories with me!

Chapter 1 – The Sports Betting Industry

Sports betting is a Billion Dollar (+) Industry that grows at an astounding rate each year. Recent studies have shown that Las Vegas, NV takes in approximately \$2 Billion a year in sports wagers compared to an estimated \$63 Billion a year that will be wagered ONLINE!!! Sports betting is a fairly simple concept, bet on Team A or Team B to win. If your choice wins, you win. If your choice loses, you lose. Just like the old game with a coin, heads and tails. However, in sports betting, odds become a factor. Many different variables are involved in the calculation of odds that one team has a winning advantage over the other.

For instance, in baseball, things such as Team Talent, Team Records, Hot & Cold Streaks, Starting Pitcher(s), Home Field, Grass vs. Turf, Day vs. Night, and Current Weather Patterns are all variables that may change one's opinion on what team may have the winning advantage over the other. This calculated advantage is otherwise known as odds.

The absolute beauty of sports betting is somebody does all of these odds calculations, the HARD WORK, for you! Each Casino and/or Sports Book has a paid employee called an Odds Maker who calculates these odds for every game. The Odds Maker sorts out all of these variables, and tries to create odds to make the game as "fair" as possible for both the Sports Book and you the bettor when placing wagers.

Therefore, looking at these pre determined odds at a Sports Book, going into a day's games, you can quickly determine what teams are considered to be the "favorite" teams on the board for the day. The payout odds on these "favorite" teams are not as high as others, and are most of the time less than 1 to 1 because they have a higher advantage of winning the game.

Using my system, we will bet on these pre-determined "favorites" knowing that it gives us the highest possible chance of winning. Look at it this way, if a successful stockbroker came up to you and recommended that you buy as many shares of the stock Google as possible, because he had done his homework and concluded that the stock was more than likely going to go up the next day, would you buy a

few shares? Even if the stock was predicted to go up by only 15%, with a small risk of it not going up at all, or even losing money, would you still do it? Of course you would! You were given an advantage, a tip on a future profitable event, by a successful stockbroker who makes a living every day in the stock market.

The Odds Maker's are our stockbrokers! They are out researching for the tips and hints, and digging in the trenches to find a statistical advantage on one team over the other. They are the best of the best, successful professionals giving us their hot tips! Follow their lead!

Chapter 2 – Baseball System: Choosing Your Daily Pick

This is the EASIEST method of picking the BEST picks you will ever use. Once again, we will be following the Odds Makers lead, and betting on the *Favorites*.

Go to your favorite Casino/Sports Book or logon to your favorite Online Sports Book and look at the current days MLB Lines. Find the game who has the highest (-) \$Money Line\$ favorite.

For example:

6:05p NATIONAL LEAGUE				Preview	Matchup	Injuries
901	Cincinnati Reds Aaron Harang (R)	+1½(-160)	<input type="checkbox"/>	+128	<input type="checkbox"/>	9 (-110)lo <input type="checkbox"/>
902	Philadelphia Phillies J.A. Happ (L)	-1½(+140)	<input type="checkbox"/>	-138	<input type="checkbox"/>	(-110)u <input type="checkbox"/>
6:05p AMERICAN LEAGUE				Preview	Matchup	Injuries
917	Toronto Blue Jays Marc Rzepczynski (L)	+1½(-120)	<input type="checkbox"/>	+180	<input type="checkbox"/>	8½ (-110)lo <input type="checkbox"/>
918	Tampa Bay Rays James Shields (R)	-1½(EVEN)	<input type="checkbox"/>	-200	<input type="checkbox"/>	(-110)u <input type="checkbox"/>
6:05p AMERICAN LEAGUE				Preview	Matchup	Injuries
919	Kansas City Royals Bruce Chen (L)	+1½	<input type="checkbox"/>	+190	<input type="checkbox"/>	8½ (-110)lo <input type="checkbox"/>
920	Detroit Tigers Justin Verlander (R)	-1½	<input type="checkbox"/>	-220	<input type="checkbox"/>	(-110)u <input type="checkbox"/>
6:10p NATIONAL LEAGUE				Preview	Matchup	Injuries
903	Los Angeles Dodgers Clayton Kershaw (L)	-1½(+110)	<input type="checkbox"/>	-137	<input type="checkbox"/>	8½ (-115)lo <input type="checkbox"/>
904	New York Mets Mike Pelfrey (R)	+1½(-130)	<input type="checkbox"/>	+127	<input type="checkbox"/>	(-105)u <input type="checkbox"/>
6:10p AMERICAN LEAGUE				Preview	Matchup	Injuries
921	Oakland Athletics Dana Eveland (L)	+1½(+115)	<input type="checkbox"/>	+230	<input type="checkbox"/>	9 (-115)lo <input type="checkbox"/>
922	Boston Red Sox Josh Beckett (R)	-1½(-135)	<input type="checkbox"/>	-270	<input type="checkbox"/>	(-105)u <input type="checkbox"/>

In the example above, we have 5 games to choose from. Looking at the Money Line Odds, we want to choose the team with the best odds of winning. This will be the team with the highest (-) Money Line odds. In this example, the Boston Red Sox would be the highest with a (-270) Money Line, and would be the *Favorite* team of the day.

Some highly paid Casino/Sports Book Odds maker spent a good deal of time and effort doing their homework to determine that this particular game has the most advantage/disadvantage over the rest of the games that day.

This will be the game that you will place your bet on. However, we will not be betting this game on the Money Line. Instead, we will place our wager for the *Favorite* team of the day to WIN on the Run Line. The Run Line will generally bring the odds back down to around even, down from the poorly paying Money Line odds payouts. In many cases, the odds can decrease by over 50% to our favor by choosing the Run Line over the Money Line. The difference in the Run Line bet vs. the Money Line bet, is you will be choosing the *Favorite* team to WIN by 2(+) runs.

Using the same example as above:

6:05p NATIONAL LEAGUE				Preview Matchup Injuries	
901	Cincinnati Reds Aaron Harang (R)	+1½(-160)	<input type="checkbox"/>	+128	<input type="checkbox"/>
902	Philadelphia Phillies J.A. Happ (L)	-1½(+140)	<input type="checkbox"/>	-138	<input type="checkbox"/>
				9	<input type="checkbox"/> (-110) <input type="checkbox"/> (-110)
6:05p AMERICAN LEAGUE				Preview Matchup Injuries	
917	Toronto Blue Jays Marc Rzepczynski (L)	+1½(-120)	<input type="checkbox"/>	+180	<input type="checkbox"/>
918	Tampa Bay Rays James Shields (R)	-1½(EVEN)	<input type="checkbox"/>	-200	<input type="checkbox"/>
				8½	<input type="checkbox"/> (-110) <input type="checkbox"/> (-110)
6:05p AMERICAN LEAGUE				Preview Matchup Injuries	
919	Kansas City Royals Bruce Chen (L)	+1½	<input type="checkbox"/>	+190	<input type="checkbox"/>
920	Detroit Tigers Justin Verlander (R)	-1½	<input type="checkbox"/>	-220	<input type="checkbox"/>
				8½	<input type="checkbox"/> (-110) <input type="checkbox"/> (-110)
6:10p NATIONAL LEAGUE				Preview Matchup Injuries	
903	Los Angeles Dodgers Clayton Kershaw (L)	-1½(+110)	<input type="checkbox"/>	-137	<input type="checkbox"/>
904	New York Mets Mike Pelfrey (R)	+1½(-130)	<input type="checkbox"/>	+127	<input type="checkbox"/>
				8½	<input type="checkbox"/> (-115) <input type="checkbox"/> (-105)
6:10p AMERICAN LEAGUE				Preview Matchup Injuries	
921	Oakland Athletics Dana Eveland (L)	+1½(+115)	<input type="checkbox"/>	+230	<input type="checkbox"/>
922	Boston Red Sox Josh Beckett (R)	-1½(-135)	<input type="checkbox"/>	-270	<input type="checkbox"/>
				9	<input type="checkbox"/> (-115) <input type="checkbox"/> (-105)

As above, the day's *Favorite* team was the Boston Red Sox at -270. We will make our play on the Boston Red Sox, to WIN on the Run Line, -1.5, which pays (-135).

This will be your play for the day! Find the team with the highest (-) Money Line, and bet (1) Unit on that team to WIN by 1.5 runs on the Run Line. That is how you

choose your pick. That is it! As easy as that! Repeat these two simple steps every day to find your pick! There are a few rules that you need to follow as well, but I will get into those in the next chapter.

Note: It is very important to make your pick and stick to it. Odds can sometimes change throughout the day all the way up to game time. Don't second guess yourself. Even if they change before game time, you made your pick already, live with it. If the early *Favorite* team of the day slips to the 3rd best team, so be it. It will still be one of the top plays. There is no way around this daily movement in odds. What I recommend is to try and find a consistent time every day to check the odds and select your team. I try to make my picks every morning while drinking my coffee. Worst case I will have my pick by lunch. I like to grab the odds as early as possible. Some like to wait just before the games start. You find what works best for you!

Chapter 3 – Baseball System: The System Rules

There are a few rules that absolutely need to be followed when selecting your daily play. I have found a couple negative factors that impact my system. Therefore, by following these few simple rules, we eliminate most of the potential damage these negative factors could have. I also recommend following these rules with ALL of your side baseball bets too! These must follow rules are:

1. **Only play ONE System Bet per Day** – There will be temptation when you see two great games on one day, and one is at Noon and one is at 6pm. ELIMINATE the GREED and only pick ONE for the system play of the day. If you want to side bet on the other, so be it. But don't count this side bet as a system play.
2. **NEVER bet in April** – There is too much unknown with the teams and players this early in the season. Odds makers have very limited information to base their initial odds on. This could present you with some great opportunity on snagging some great lines on some absolute locks. However, it more than often spells disaster. It is best to sit this opening month of the season out.
3. **NEVER Place a Wager On a Run Line That is Over -175** - Too much risk for just a small profit win. Move on to the next best line that day.
4. **If a Team That You Choose Loses, DO NOT Use That Exact Team Matchup Again in That Current Series** - Example: If the Yankees were your play against the Nationals on Monday, and the Nationals won and you lost your bet, do not bet on that matchup again during that current series on Tues or Wed, no matter what the odds are. The Underdog opponent may have the Favorites "number" that series. You lost once on that team already. Now stay away until they are separated and clear of each other. Move on to the 2nd best "favorite" that day.
5. **Money Line TIE BREAKER for Choosing the Favorite of the Day** – If there happens to be a tie in the highest Money Lines when choosing the Favorite of the day, choose the team that has the best **paying** odds on the Run Line. If there is yet a tie, choose the team that is playing at HOME. If still tied,

choose the team that has the starting pitcher with the best record. If still tied, Flip a Coin!

- 6. NEVER Bet if There are Less Than 3 Games Offered That Day** – There needs to be at least minimum of (3) games to choose from in order to make a system play for the day. No need to force yourself to choose a sub-par game because of limited options.
- 7. ONLY Bet During Regular Season** – Playoffs are fun to watch, but the system bets are off. You should have made a killing by the season's end. So, sit back and count your money while watching the playoffs!

Chapter 4 – Baseball System: The Betting System

We now have our pick of the day established. Next, we need to know the betting system that is going to produce such amazing results. What I did, was take an old fashioned Roman Chase System and added much needed strategy. The original Roman Chase system worked like this:

Bet (\$1) on Bet A:

If you win Bet A – Repeat Bet A

If you lose Bet A - Double Your bet (\$2) on Bet B. (This way, when you win, you cover your \$1 loss on bet A, and win \$1profit on Bet B.)

If you lose Bet B - Double your bet (\$4) on Bet C. (When you win, you cover your \$1 loss on bet A, your \$2 loss on Bet B, and win \$1 profit on Bet C.)

If you win Bet B – Repeat Bet A

If you lose Bet C - Double your bet (\$8) on Bet D (When you win, you cover your \$1 loss on bet A, your \$2 loss on Bet B, your \$4 loss on Bet C, and win \$1 profit on Bet D.)

If you win Bet C – Repeat Bet A

You would continue down the line with this structure as far as you had to until you won a bet. Every time you win, you go back to the start with Bet A. Therefore, every time you won a bet, you would NET a \$1 profit. That being said, you could chase a 14 game losing streak and win the 15th game. Since you won back all of your money, you essentially erased all of the 14 games you lost and hit a profit of \$1 on the 15th. You would now count this 15 game series as 1-0 record and not 1-14 being that you came out ahead on the series.

The problem with this system lies when you start Chasing 6, 7or even 8 game losses in a row and your bet escalades quickly to a very high amount to win \$1! If you were on an 8 game chase, your 9th bet would need to be \$255 to NET a \$1 win! Yikes! In a perfect world, and equipped with an enormous starting bankroll, this would be a great system for anybody. However, most of us don't have a huge bankroll to start with.

By adding a few twists of strategy to this old fashioned system, I have created a system that will yield massive results! So, without further ado, here it is:

You can start with any size bank roll. I recommend starting with at least \$300, but any amount will do for now. Take your bank roll and divide it by 30. This will be your Starting Unit. The nice part about this system is you can add or subtract money from your bankroll at anytime during the year. However, each time you adjust your bankroll size with deposits or withdrawals, you will need to recalculate your Starting Unit.

Choose your play for the day and bet 1 unit on it as Bet A. If you win, choose your new play tomorrow and repeat Bet A. If you lose, double your bet for a total of 2 units on tomorrow's play of the day, as Bet B. If you win Bet B, repeat Bet A. If you lose that bet, double your bet one more time to 4 units on tomorrow's play of the day, Bet C. **Now, if you win Bet C, go back and repeat Bet A tomorrow. If you lose Bet C, count it as an official system loss, and go back to Bet A as your next bet tomorrow as well.**

What I have done is maxed out the Chase to a 3 game loss max. If you lose 3 games in a row, chalk it up as a loss and start over. By keeping the chase to a 3 game loss max, we keep the Units from quickly multiplying out of control into a large risk to win a small reward. What I aimed for was lowering our overall risk and giving us the best investment return ratio based on our original starting bankroll.

Sometime it is possible to realize a negative gain after a BET C win. If the BET C team has say, -150 odds, and it is your 4 unit bet (to cover the 1 & 2 unit losses), the winning result would pay 2.66 units. In these cases, it is acceptable to suffer a small .33 Unit Loss, than to chase yet another game by betting a higher amount to cover the odds payout. Once again, the reason I kept it to a 3 game loss max is to keep our bets from skyrocketing to cover a 1 unit win.

Chapter 5 - Baseball System: Money Management for Massive Profit

The key to splitting the Casino's / Sports Book's cash vault wide open, and generating Massive Profit, is pure money management. You could make the right pick 99% of the time, and still lose money at the end of the season if you are careless with your wagers. Carefully following a strategic money management system is the only way to make an absolute killing in this industry.

If you started my system using a \$10 bet in May of 2006, you would have made over \$13,000 in pure profit in just 29 months! This system will not turn you into a millionaire overnight. So, please don't go into work tomorrow and turn in your resignation.....just yet anyways. This is where the system starts to heat up!

What we do now is start progressively adding onto our bets once we start winning. A Re-investment strategy if you will. The key to this stage is only raising our bet once we are winning and showing a profit. This is where we will be using Other People's Money (OPM), our profit, to leverage our bets. Once we obtain certain levels/percentages of profit based on our original starting bank roll, we will add additional Units to the bet. We start by adding 1 unit to our bet every 25% gain we see off the original starting bankroll.

To figure out your Percentage of Return on Starting Bankroll, simply take your current bankroll amount, subtract your starting bankroll amount, and divide this number by the starting bankroll amount again. Once you get your answer, move the decimal point over two digits to the right. This will be your Percentage of Return on Starting Bankroll.

Once again, we will add an additional Unit at each 25% interval (25%, 50%, 75% and 100%) until we hit a 100% gain. Once we hit a 100% gain, we will add an additional unit on every 50% gain we see from then on (150%, 200%, 250% and so on).

Return on Starting Bankroll	<0%	0%-24%	25%-49%	50% - 74%	75%-99%	100% - 149%	150% - 199%	200% - 249%	250% - 299%	300% - 349%	Each additional 50%
Betting Unit	1	1	2	3	4	5	6	7	8	9	Add 1

If we lose a series of 3 bets and suffer a system loss, we will then re-adjust our betting units as well, and possibly lower them back down. Losses happen! Please do not be disappointed if and when you realize a loss. At this point, we will simply recalculate our Percentage of Return on Starting Bankroll. Take this percentage and reference it to the above chart to determine where to start your next bet. If you are below Zero profit and are operating using your starting bank roll money (operating at a loss), use the “original” starting bet of 1 Unit.

It is extremely important to not adjust the betting units during the middle of a chase. If you are on game 3 of a chase, and your new percentage of return has dropped a level, do not adjust until after you experience a system win or loss. The key of the system is to be constantly keeping track of your return and adjusting your betting units accordingly after each system win and loss.

Chapter 6 – Baseball System: System Overview

Using my system of choosing the Favorite of the day, applying the systems 7 simple rules, following a simple 3 game max chase, and leveraging your money, I have achieved an amazing, DOCUMENTED RECORD (see the end of the book for the actual picks), of 330 Wins and just 26 Losses over the last 4 years!

2006: 76-6 (92.6%) with a 104% Return on starting bankroll

2007: 82-5 (94.2%) with a 438% Return on starting bankroll

2008: 88-7 (92.6%) with a 304% Return on starting bankroll

2009: 84-8 (91.3%) with a 26% Return on starting bankroll

This system will generate massive profits with minimal investment. If your 401k statement showed a 15% gain in a year, you would be ecstatic! This system is averaging over 218% annual gains, over the last 4 years, on your starting bankroll! I am not telling you to switch over your entire 401k or other investments.

However, think of the following. What if you started my system in May of 2006 with a \$3,000 bankroll, resulting in a starting unit bet of \$100, and reinvested your yearly profits into the next 3 years starting bankrolls, what would be the result? You would have rolled into the 2010 season with a starting bankroll of over \$164,000 and a starting unit bet of approximately \$5400!

Based on the history of this system, 2010 should finish with the average gain of 218% on your starting bank roll of \$164k. The estimated ending bankroll in 2010 will be just over a half million dollars (\$521,520) in PROFIT in less than 4 years based on an initial investment of \$3,000!

Now, roll that \$521,520 bankroll into 2011. Divide by 30, and you have a new starting unit bet of \$17,384. Using the average annual return of 218%, you will finish at an estimated.....\$1,658,400!!! Congratulations! You have just become

a MILLIONAIRE in (6) MLB seasons off of an original \$3,000 investment! Who needs a stock broker or financial planner (sorry Mike!). Who needs a job! This is it!

Could you lose? There may be a year where you may lose a little or break even (2009 finished at 26%). That is the law of averages. There also may be another year like 2007 and you hit 400% (+) return too! It could very well happen.

Uncontrollable variables lie in everything. Please understand the concept I am trying to get you to see. We are making the most educated and safest bets we can possibly make while optimizing the units we bet for massive profit. We are using someone else's hard work (Odds Makers) and making a killing off a sport we enjoy watching (I guess you really don't even have to like baseball 😊).

I am sure you are anxious to get out there and start making some money. Go out have fun, and I hope to hear success stories from each and every one of you!

Chapter 7 – Baseball System: Must Do’s to Avoid Potential Problems

Mid-Season Entry – If you just purchased this system and the season has already started, the best time to start is immediately following a system loss. I am not saying you can’t jump right in if you wish, but you will be minimizing risk if you wait until after a Loss.

Track ALL of your results! Anybody that wants to take sports betting seriously MUST track their results. I use Microsoft Excel as it is an easy to use spreadsheet program for your computer. I track the following for each game I bet on:

<u>DATE</u>	<u>HOME</u>	<u>\$L</u>	<u>AWAY</u>	<u>\$L</u>	<u>SCORE</u>	<u>RL</u>	<u>W</u>	<u>L</u>	<u>WAGER</u>	<u>RESULT</u>	<u>BANKROLL</u>	<u>CHANGE</u>	<u>NEW</u>
2006											300		
1-May	det	-220	kc		3 2	-110		L	10.00	(10.00)	290.00		

These are very simple categories, but they need to be documented so you know when to strategically adjust your betting units.

Date – The date the game and wager were placed on

Home – Home Team

\$L (Home)– Money Line Odds at time of Wager (listed for both home and away. Only track the favorite’s money line)

Away – Away Team

\$L (Away) - Money Line Odds at time of Wager (listed for both home and away. Only track the favorite’s money line)

Score – Final Score, Home team listed first.

RL – The Run Line Odds at time of Wager

W – Did your bet Win

L – Did your bet Lose

Wager – The amount of money you bet on that game

Result – How much money did you Win or Lose (losses are entered as -\$xxx)

Bankroll – Your adjusted bankroll after your Win or Loss

Change – This is where I track results and know when to increase my bets. Once I hit the change mark, say 25%, I will put “ADD” in this column. If I adjust betting units after a loss, I will put “SUBTRACT” in this column.

New – I will then put the new Betting Amount in this column.

Do not keep all of your eggs in one basket! If you start consistently pulling \$50,000(+)/week out of the sports book at say, The MGM Grand in Las Vegas, don't be surprised to become an unwelcomed guest and be possibly banned from the premises. Casinos will gladly be your best friend when you are losing money to them, but when they start noticing you are a consistent winner, a consistent BIG winner, with a betting style that resembles a pattern of sort, you will no longer be considered their friend.

Spread your bets out. Maybe play your entire Bet A's at one Casino. Then play all of your Bet B's at another. The Massive Bet C's at yet another. This way each casino will see both wins and losses from you in a more consistent betting pattern.

I recommend having at least 5-6 Casinos/Sports Books at your call. It is also a great way to build sweet comps from these Casino/Sports Books as well! Free Trips, Dinners, Rooms, Concerts, and other Gifts are always welcome in my book! Be aware that many casinos share the same parent company such as Harrah's group, MGM group etc. Try not to use two Casino/Sports Books share the same parent company if at all possible, because your betting information will be shared between them.

Losing Sucks! However, it will happen. Hang in there! Don't get all bent out of shape when you lose 3 games in a row. Even the best of the best baseball teams have a bad day. They're human after all! I know it will hurt the bank roll, especially after that lager C bet. However, the system was created to incorporate multiple losses throughout the season and still be successful! Stay positive!

Pay attention to bet limits! Some casinos may cap your action at \$2,000-\$5,000 per bet during regular season. In cases where you have to make a \$25,000 bet,

you may have to spread the action out to (5) different casinos at \$5k/each. Please note, that as you start spreading your bets out, you may not find the exact same odds at each casino. This is ok. It is not an exact science. You already made your decision on the Favorite. Place the bets on that Favorite at each Casino /Sports Book and you should not see too much of a swing in the odds. That being said, try to place all of your bets as close together in time as possible to eliminate any possible change in the odds.

Online Casinos / Sports Books- These are great to start out with, especially if you don't live near a Casino / Sports Book that you can physically visit. They too will eventually cap you out, but at even less around \$500 - \$900 a bet. Some will let you call bets in up to \$5,000. However, when betting that high of an amount per bet, I prefer live Sports Books. Therefore, as mentioned above, become a member of multiple online Sports Books to spread your bets out.

You will also have to be careful when choosing an online Casino / Sport Books as there are many fly-by-night websites that are here today and gone tomorrow. As a Bonus for purchasing my betting system, I have provided a list of online Casinos / Sports Books that I personally use and approve of below in Bonus #1.

Click on these links and they will offer you special sign up bonus only offered to referrals from The ACE of Sports Picks. Many will offer a 10%- 50% sign up bonus, which is an instant win, OPM!

Once again, be aware of betting limits once you start making the larger bets and spread you bets out so each Casino / Sports Book see's a consistent pattern of bets that are not threatening to them.

For United States bettors, the above list all Welcome United States customers. You can deposit through Credit Card, Bank Wires and online deposit account such as Neteller and eWallet Express. As far as online withdrawal and payouts are concerned, as a new account holder, be prepared to wait as long as 30 days before receiving you payout from the online Casinos / Sports Books. However, once you start becoming a high roller with them, these turn times can be as little as 2-4 days. So, be patient to start.

It may not hurt to invest some of your winnings on a down payment for a home in Las Vegas and make it a seasonal career! I am serious! Think of it, spending July-September in your vacation home, I mean “office”, in sunny Las Vegas, NV. Waking up in the morning and driving in your new Range Rover, I mean “work truck”, to the Casino/Sports Book. Walking in and cashing in your massive winning ticket from the night before, and placing your next winning bet for the day. Then, have a delicious, gourmet lunch on the Casino/Sports Book using your comps. Drive back home and sit by the pool all day until your game starts. Get dressed, go back to the Casino/Sports Book of your choice, sit down and have another gourmet, 5 course meal, on their dime once again using your comps. Then watch your daily pick destroy the competition at the Casino / Sports Books trendiest sports bar or lounge enjoying free drinks and other party favors. After the game, go to the hottest night club in the city to celebrate your hard day at work! Go home and sleep. Wake up and repeat. Not a bad day.

Uncle Sam, Tax Liability and The IRS - By no means am I an accountant. However, you will NEED to consult an accountant to make sure that you are taking care of your legal tax liability, if any, in the state or country you reside in. It will be very hard to go unrecognized by the IRS and/or other authorities when you are dropping \$50k deposits into your bank account every week. Be responsible and find a good accountant and attorney that also work with Lottery Winners and Casino Winners. Your favorite Casino host will have information on where to find a good accountant and attorney in that department.

Be Careful of Temptation, ELIMINATE EMOTION!!!! – The (2) ingredients that could absolutely destroy you in sports betting and you must REMOVE from your actions are.....GREED and EMOTION!

Once you start easily winning on the systems baseball game picks, you will start to develop a trigger finger and want to start betting on other games as you think you are unstoppable! I know this for a fact, because it happens to me as well. It is ok to place some side bets, but KEEP YOUR SYSTEM BETS AND RESULTS SEPARATE FROM YOUR SIDE BETS! Try not to bet more on your side bets than your system bets, otherwise you risk losing all your Easy Earned profits!

Please also be aware that temptation to BLOW MONEY is tough to fight when you are walking around with huge wads of cash in your pocket. When you are making great money, don't feel the need to give it all back. I am not talking about buying clothes, cars and other things with your money. I am talking about Gambling on other things and losing the money back. Black Jack tables and slots can be ones worst enemy! I am not saying you cannot ever play these games again, absolutely not. I too like the occasional thrill of a night at the tables. But don't get carried away. These games offer too many uncontrollable variables and do not present you with the best opportunity to make money.

ONLINE CASINO USERS BE EXTRA AWARE OF THIS: It is super easy to drop electronic money! In real life you can feel the actual cash and/or chips. Online, all that is between you and your electronic money is the click of a button! Please use extra caution with this. I am telling you from MY PERSONAL PAST MISTAKES.

Chapter 8 – Basketball System: Introduction

Alright! So, we now know how to tear up the MLB during the months of May-August. What shall we do during the off-season? Well, naturally, invest more into sports of course!

The NBA has offered a trend that is just too hard to pass up. The daily moneyline favorite wins, straight up, more than 90% of the time! 9 OUT OF EVERY 10 WIN! This means we don't have to use any method of "Chase" system to win! The only downside is that we play with pretty heavy odds, sometimes betting \$1 to win only \$.05!!! However, with a 90%(+) hit rate, proper money management, a few easy to follow rules, this heavy leveraging of money is a smart play.

For instance, you bet \$100 on a (-1250)NBA game and you win a whopping \$8. However, odds were heavily with you and you just made 8% in one day! Some financial planners try very hard, at much more risk, to make this type of gain on your money over an ENTIRE YEAR!

Over the past 3 NBA seasons, this system has yielded some very positive results:

2006-200761 Wins/4 Losses.....93.8% Winning Percentage.....118% ROI

2007-200884 Wins/5 Losses.....94.3% Winning Percentage.....146% ROI

2008-200986 Wins/6 Losses.....93.5% Winning Percentage.....147% ROI

Not a bad return for your bankroll while you wait for the MLB season to roll back around! Your Total Annual Return on Investment, based on your starting bankroll each year just SKYROCKETED!

For Example: If you started the 2008 MLB season in May with a bankroll of \$300, you would have turned that into \$1,212 (304% ROI). Then in October, you would have started your off-season (2008-'09 NBA season) with a starting bankroll of \$1,212 and turned it into \$2,993 (147% ROI). Based on your starting bankroll of \$300, the final amount of \$2,993, and a (12) month investing period, your total annual return would be **898% ROI!!!**

Chapter 9 – Basketball System: Choosing your Team and System Rules

Just like when choosing your team in baseball, we are going to look for the single team with the best odds of winning using the moneyline. However, this time we are not going to switch are bet to the point spread (or run line in MLB). We will stick with the moneyline as our bet.

Now, apply these simple rules before you place your wager to make the proper selection.

1. **Only play ONE System Bet per Day** – There will be temptation when you see two great games on one day. ELIMINATE the GREED and only pick the ONE highest moneyline, the system play of the day. If you want to side bet on the other, so be it. But don't count this side bet as a system play or as part of your system bankroll.
2. **NEVER bet in April** – The NBA Playoff push is in full stride by now. However, the teams that are out of it, start playing a lot of their bench players and even try to lose (they will never admit it) to get a better chance in the Draft Lottery for the following season. This could present you with some great opportunity on snagging some great lines on some absolute locks. However, it more than often spells disaster. It is best to sit this final month of the regular season out.
3. **NEVER Place a Wager on a Money Line that is Over -1999** - Too much risk for just a small profit win. Once we drop below the possibility for a 5% gain (win), it becomes too risky! I have seen -3000(+) teams straight up lose! We have to draw a line for max profitability over the long haul.
4. **NEVER Place a Wager on a Money Line that is Under -550** – Once we drop below -550 money lines, there tends to be many more upsets. The NBA can become the Wild, Wild, West at any given time. Staying above -550 gives us the best chance of winning. **MAX PROFITABILITY ZONE = (-550) – (-1999)**. If there are no teams/matchups that fit into this ZONE, then there will be NO PLAY for the day!
5. **Money Line TIE BREAKER for Choosing the Favorite of the Day** – If there happens to be a tie in the highest Money Lines in the MAX PROFITABILITY

ZONE when choosing the Favorite of the day, choose the team that has the **highest point spread**, still using the money line as your wager. If there is still yet a tie, choose the team that's matchup predicted OVER is the highest. If still tied, choose the home team. If still tied, Flip a Coin!

6. **ONLY Bet During Regular Season** – Playoffs are fun to watch, but the system bets are off. You should have made a killing by the season's end anyways. So, sit back and count your money and get ready for the start of MLB!

7. **Mid-Season Entry** – If you just purchased this system and the season has already started, the best time to start is immediately following a system loss. I am not saying you can't jump right in if you wish, but you will be minimizing risk if you wait until after a Loss.

Chapter 10 – Basketball System: The System and Money Management

The system is easy, follow the above rules and place your wager on the team that fits into the MAX PROFITABILITY ZONE. This team will have over a 90% chance of winning, period. Therefore, there is no need to use a CHASE system! Not to mention we would need a large bank roll to administrate a chase system when we are playing such heavy odds anyway.

We will use a starting Unit bet of 33% of your bank roll. Yes, you read this correctly. If your starting bankroll is \$300, your base Unit for this NBA System will be \$100 (33%). Because the odds of winning are heavily in our favor, and our per bet profitability is so low, we need to leverage as much as we can every bet.

Over the last (3) NBA Seasons, winning streaks either tend to be very small (1-5 Wins) or rather large (16+ Wins).

1-5 Wins = 7 Streaks

6-10 Wins = 6 Streaks

11-15 Wins = 1 Streak

16+ Wins = 8 Streaks

I wanted to utilize this HOT ZONE where streaks rarely end, 6-15 Wins. That being said, we will use the following, simple, money management system for the NBA System only.

Money Management:

Bet (1) Unit per game until (5) Consecutive Wins have been reached, then ADD (.5) Unit to the bet. Bet this new amount of (1.5) Units for the next (10) Consecutive Wins (15 Total) or until a Loss has been reached. Which ever happens first. Then, reduce the betting Unit back to (1) Unit, until (20) total consecutive wins are reached. After (20)wins, we will quit betting and wait for next system loss to continue.

Chapter 11 - System Step-By-Step Instructions

Baseball System

Choosing Your Pick

- ✓ Sign up with at least (2) of my recommended online Sports Books and grab your free cash bonuses
- ✓ Go to your favorite Casino/Sports Book and look at the day's current baseball lines
- ✓ Find the Team that has the highest (-) Money Line odds
- ✓ Apply the (7) Rules from Chapter 3
- ✓ Bet on the resulting Favorite Team using the RUNLINE odds
- ✓ Document and track your picks and bet amounts

Amount To Wager - Initial

- ✓ Starting A Bet Unit = Starting Bankroll divided by 30 – This will be your Initial Betting Unit for the System
- ✓ B Bet Unit = 2 Units (A Wager (x) 2)
- ✓ C Bet Unit = 4 Units (B Wager (x) 2)
- ✓ D Bet Unit = 1 Unit (After 3 Losses, back to A Bet)

When To Change Wager

- ✓ After EACH System WIN and LOSS, document the percentage (%) of your System PROFIT compared to your starting bankroll
- ✓ Take the resulting percentage and apply to the following chart:

Return on Starting Bankroll	<0%	0%-24%	25%-49%	50% - 74%	75%-99%	100% - 149%	150% - 199%	200% - 249%	250% - 299%	300% - 349%	Each additional 50%
Betting Unit	1	1	2	3	4	5	6	7	8	9	Add 1

- ✓ Adjust Wager Accordingly

System Step-By-Step Instructions

Basketball System

Choosing Your Pick

- ✓ Sign up with at least (2) of my recommended online Sports Books and grab your free cash bonuses
- ✓ Go to your favorite Casino/Sports Book and look at the day's current basketball lines
- ✓ Find the Team that has the highest (-) Money Line odds
- ✓ Apply the (6) Rules from Chapter 9
- ✓ Bet on the resulting Favorite Team using the MONEY LINE odds
- ✓ Document and track your results

Amount To Wager - Initial

- ✓ Starting Bet Unit = Starting Bankroll divided by 2 – This will be your Initial Betting Unit for the System for the entire season

When To Change Wager

- ✓ After (5) Consecutive Wins, Raise Betting Unit by (.5) and bet (1.5) Units until (15) TOTAL Consecutive wins OR a Loss has been reached. Then, reset betting Unit back to (1).
- ✓ After (20) wins, stop betting until next loss.

After Thoughts

Treat this as your business and you will be successful. Set your limits. Maybe you do not feel comfortable betting \$15,000 on a game and making \$2 million in a year. THIS IS PERFECTLY FINE! Maybe you will be happy making \$100,000 / year and will taper your betting strategies and starting points based on that target result. You do not need to drive a Lamborghini to consider yourself a sports betting champ. However, if that is how you choose to spend your money, so be it! Have fun with your money!

With my winnings, I am personally trying to accumulate as much U.S. Real Estate at a heavy DISCOUNT as possible! The market will turn around some time in the next 5 years. If I can find distressed and/or foreclosed homes for pennies on the dollar, and sell them still at a discount (nickels on the dollar), I will create Massive Profit with that too! Learn more about this kind of investing by checking out <http://www.RealEstateisHotNOW.com>

Please send me your TESTIMONIALS to put on my web page! Feel free to add video and/or photos!

Email me at: TheACEofSportsPicks@gmail.com

Bonus #1 – The ACE of Sports Picks Top Rated ONLINE Casinos / Sports Books

Click on these links and they will offer you special sign up bonus only offered to referrals from The ACE of Sports Picks. Many will offer a 10%- 50% sign up bonus, which is an instant win, OPM!

1. **BETUS** – Ease of use and great comps throughout the year!
50% Match Sign Up Deposit Bonus & 50% Re-Load Bonuses
[CLICK HERE](#) to be re-directed to [BETUS](#)
2. **BODOG** – Simple to use and ease of Deposits & Withdrawals, Cash Comps

4. **LEGENDZ** - Ease of use, great service
20% Match Sign up Bonus & 10% Re-Load
[CLICK HERE](#) to be re-directed to [LegendZ](#)

Bonus #2 – The Baseball POWER System

POST ALL START BREAK – AKA – “*Hunting Season*”!!!! Now it is time for the kill! For those of you who are starting this system just after the All Star break, you are in for a treat! This is where you will DOMINATE! In the last 3 years, this system has only experienced (3) Losses after the All Star break, and only (9) Losses over the last 5 years!

In the early months of April and May, teams are still “warming” up, if you will. It becomes difficult for Odds Makers to determine dominant players, teams and trends this early in the season. In the months of May and June, Interleague games are being played as well. Some teams have not played against their opposite league opponents for decades! That being said, scouting reports are not as accurate as teams they play in their own league on a regular basis. This makes interleague sometimes difficult to wager on as well.

However, by the All Star break, many teams and players start to become more settled in and are seeing their respective league / divisional opponents for the 3rd time now this season. Therefore, the Odds Makers have more to back their decisions on and know what to expect. If you are a very patient bettor, and can hold off to early July before making any system bets, post All Star break is when to play your money using the system for an INSANELY MASSIVE PROFIT!

Being that the Odds Makers decisions on favorites in games are getting more and more precise, the odds become a little less attractive to us. However, the Odds Makers are making our system more and more precise as well, thus only (11) losses in the last 6 years! Using this to our advantage, we will change our money management strategy here.

We will adjust our starting unit bet from a fraction of 30/1 to a new starting unit bet of **15/1** of the starting bankroll. Therefore, if you had a starting bankroll of \$300, your starting unit bet would be \$20 ($\$300/15=\20).

We will also change our strategy as far as when we will raise our bets based on return ratios. We will change to the following format:

Return on Starting Bankroll	<0%	0%-74%	75%-149%	150% - 224%	225%-299%	300% - 449%	450% - 599%	600% - 749%	750% - 899%	900% - 1049%	Each additional 150%
Betting Unit	1	1	2	3	4	5	6	7	8	9	Add 1

The following are the Post All Star break numbers, over the last (3) years:

2006: 46-1 netting a 1,290% RETURN on starting bankroll!

2007: 44-1netting a 166% RETURN!

2008: 52-1netting a 1,353% RETURN!

2009: 48-2netting a 156% RETURN

A new average annual return on investment of 741% over the last 4 years!

Once again, what if you would have started using my POWER SYSTEM back in 2006 with only a \$300 Bankroll and a \$20 starting unit bet, where would you be now? You would have made over \$412,000 in PURE PROFIT in less than 4 years! You would then roll into the 2010 MLB season with a starting bankroll of \$412,000 and based on the POWER SYSTEM's annual rate of return of 741%, watch your stack of money grow into an estimated \$3.4 MILLION (+) by the end of 2010!

Bonus #3 – The ACE’s VIP Club

Congratulations on the first day of the rest of your sports betting career! To make your life even easier, I have included as an extra bonus, a Risk Free (30) Day Trial Membership to The ACE’s VIP Club! I will email you at least (10) of my 3,4,or5 Star Rated (Non-System)Sports Picks during your (30) day trial, via email! Use these as icing on the cake and do not mix them with your system picks!

These VIP top rated picks will come in the form of an email and include picks from NCAA Football & Basketball, NBA, MLB, NFL, NHL, MMA, Boxing and more! Some days I may have 5 picks and some days I will have ZERO! I pick and choose my battles and will only recommend the top rated picks that I feel will WIN!

If you are happy with these additional money making, top rated VIP picks after your Risk Free (30) Day Trial, I will supply you with information on how to become a FULL ACCESS VIP MEMBER for the price of \$29.95 / month. If you think you are not getting extra value from these daily picks, and wish to cancel your trial membership, do absolutely NOTHING after your (30) days and you will not be charged a dime! I am not going to trick you into joining my VIP Club. If you want to become a member after the trial, then you will supply me with payment information. If you don’t choose to continue after (30) days, I will cut you off! That simple. Truly risk free!

Once a Full Access VIP Member, you will receive a guaranteed (20) picks a month with the option to cancel at any time!
